

TRACK, ANALYZE & IMPROVE FLEET OPERATIONS

ALL-IN-ONE FLEET MANAGEMENT SOFTWARE

Geotab Integration

Seamlessly integrate your Geotab devices with Fleetio.

Get automatic odometer readings.

Odometer readings automatically sync every day or use the one-click option to manually trigger a sync at any time.

Resolve failed inspection items with maintenance workflows.

Automatically create issues from failed inspection items from your Geotab DVIRs. Quickly assign service work for a speedy repair and resolution.

Report on fuel location exceptions.

Fuel card transactions are automatically compared against actual vehicle location and geolocation differences exceeding a certain threshold are flagged. Get a daily email summary and detailed map visualization.

Manage Diagnostic Trouble Codes (DTC) & engine faults.

Get an email notification of new fault codes (with the option to ignore) and create an Issue in Fleetio from a fault code with one click.

Set your current vehicle location in Fleetio.

Easily see a vehicle's current location right on the vehicle profile page in Fleetio.

Navigate seamlessly between systems.

View a vehicle's current location directly from its vehicle profile in Fleetio or use the "View in Fleetio" button in Geotab to navigate to the vehicle profile in Fleetio.

Geotab Integration Setup

Setting up the Geotab integration is simple.

Step 1

An Admin user on a Fleetio account can go to the GPS Integrations section of the Account Settings area and add their Geotab credentials.

Step 2

All Geotab devices are then listed and can be mapped to the appropriate vehicles in Fleetio.
